Visual Studio Magazine

BUYERS GUIDE

PRODUCT LISTINGS

The 2010 Visual Studio Magazine Buyers Guide listings comprise more than 600 third-party products and services for Visual Studio and .NET development, ranging from application components and developer tooling to training and Web hosting services. In many cases, the products presented here are available in multiple editions or SKUs, and may also be available as part of a suite or other bundled offering. Make a point to check with vendors directly to get complete information about specific product configurations and pricing.

We continue to see new and innovative tools from established vendors and upstarts alike. Is there a tool or service you're familiar with that our readers should know about? E-mail us at mdesmond@1105media.com.
